

## PEAS Case Study

Upstream Oil & Gas

### Client Profile

A \$7.9B Oil & Gas Company

### Business Issue

- Company seeking to hold CapGemini accountable to deliver the value they signed up for
- Sought to reduce the probability of their failure to deliver being the source of a change order
- Containment of costs with CapGemini
- Needed to enhance the quality of program decision making

### Services & Results

- **On-budget delivery of \$100M+ program**
- **On-time program delivery in an incredibly volatile economic environment**
- Enabled project team to have the ability to manage the program independent of incentives and driving lower costs
- Held SI to high quality deliverable standards resulting in high quality planning and lower unplanned cost expansion
- **Achieved lower overall costs on project change orders** as a result of independent vetting and assessment
